EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Wilford on January 18th, 2006.

The application has been amended as follows:

Claim 1, line 5, after "...a crank-shaft gear fixed on the crank shaft..." insert - - and positioned on a weight plane substantially perpendicular to the axis - -.

Claim 1, line 13, after "...opposite the tie rod and orbiting in..." delete "a" and insert - - the - -.

Claim 1, lines 13 and 14, delete "...substantially perpendicular to the axis..."

Claim 1, line 17, after "...a counterweight gear fixed on the counterweight shaft..." insert - - and positioned on the weight plane - -.

Claim 14, line 5, after "...a crank-shaft gear fixed on the crank shaft..." insert - - and positioned on a weight plane substantially perpendicular to the axis - -.

Claim 14, line 13, after "...opposite the tie rod and orbiting in..." delete "a" and insert - - the - -.

Claim 14, lines 13 and 14, delete "...substantially perpendicular to the axis..."

Claim 14, line 17, after "...a counterweight gear fixed on the counterweight shaft..." insert - - and positioned on the weight plane - -.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of (with respect to claim 1 and 14) "...a crank-shaft gear fixed on the crank shaft and positioned on a weight plane substantially perpendicular to the axis... a compensating weight fixed eccentrically to the crank opposite the tie rod and orbiting in the weight plane on rotation of the crank... a counterweight gear fixed on the counterweight shaft and positioned on the weight plane..." are not anticipated or made obvious over the prior art of record in the examiners opinion. For example, Rehag '369 discloses a drive for reciprocating a roll stand which teaches a crank (figures 6-7, part of crank drive K, see col. 4, lines 33-34), a tie rod (rod 5), a compensating weight (weight A, figures 6-7), a counter weight offset along the weight plane from the crank (weight B2, figures 6-7), a drive means connecting the counterweight to the crank (motor as described in col. 3, lines 14-15 and associated gearing 10, 11 and 12). Shafts carrying the compensating weight and counterweight and gearing are shown in figure 6 as shafts 7-9 and gearing 10-12. However prior art of record fails to teach or disclose the relationship of a crank-shaft gear, a compensating weight, a counter gear and counterweight shaft with a planar positioning as claimed and in combination with the remainder of the claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dmitry Suhol whose telephone number is 571-272-4430. The examiner can normally be reached on Mon - Friday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on (571) 272-4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
